**MIDDLE ATLANTIC PRODUCTS QUIET-COOL™ SERIES CONSOLES
SUPPORT MULTIPLE LOCATION SECURITY INSTALLATION
BY CAM -TEK SYSTEMS**

ORLANDO, FLORIDA, September 12, 2005 — Showcasing the advantages to security systems integrators and their customers of its fully-welded Quiet-Cool™ Series security console, Middle Atlantic Products has supplied Cam-Tek Systems of Mechanicsburg, PA with 30 consoles to house CCTV and Access Control systems for installation in a multi-state chain of grocery stores.

Cam-Tek has been tasked with the continuing program of refitting existing stores and outfitting all new stores with a dedicated security room with authorized user access only. Each room then houses a dual position Quiet-Cool console from which security personnel can monitor activity in the store and parking lot. The console features dual racks that house various types of CCTV equipment such as DVRs, Monitors, Flat Screens, Video Printers, Power Supplies, and a rack mount UPS. Each desk has additional space for various controllers.

“We chose Middle Atlantic Products’ Quiet-Cool consoles because of the quality of construction and thermal design,” said Kortney Dunkle, President of Cam-Tek Systems. “Aesthetics are also important and we felt that this console presented a high quality image and neatly showcased the CCTV equipment we specified.”

The Middle Atlantic Products Quiet-Cool Series™ surveillance and monitoring consoles have been engineered to address the unique challenges of housing digital security equipment such as DVRs and hard drives. The Quiet-Cool Series’ active thermal management system keeps heat-sensitive digital equipment cool through the use of filtered air intakes, baffled fan exhausts and gasketed doors. By maintaining optimal operating temperatures, equipment life is extended and maintenance cycles are reduced.

The Quiet-Cool Series also features built-in sound isolation including acoustic damping material on the insides of side panels, gasketing on all doors and quiet-running fans. Baffled fan exhausts and air intakes isolate the operator from noise generated by such equipment as DVRs and hard drive arrays.

Because traditionally optional features are standard on Middle Atlantic Products Quiet-Cool Series™ consoles, specifying and ordering is extremely simple due to the limited number of sku's associated with the product. The factory-welded 14-gauge steel construction provides superior strength and also makes for quick installation in the field with no assembly required. Additionally, built-in features on consoles and related equipment such as 45° connecting wedges and top monitor racks facilitate effective cable management, saving even more valuable installation time.

About Middle Atlantic Products:

Middle Atlantic Products, Inc. is headquartered in Riverdale, New Jersey and is an ISO 9001:2000-registered leading manufacturer of state-of-the-art steel enclosure systems for a wide range of applications, including the security, commercial audio video installation, broadcast, post production, structured cabling and premise wiring markets. For over 25 years the company has been dedicated to the proposition that the enclosure system is as important as the equipment it protects. Middle Atlantic Products incorporates application-driven engineering into every system it designs in order to meet the individualized requirements of the broadest range of installers.
